This is how you can show verbatim code chunks in the output. This is using a `{verbatim}` chunk (check the source `index.qmd`):

If you want to show the triple backticks inline, you can also do so, like this: ````{r}` to start an R chunk and ````` to end it. Check the source.

Figures

Use `knitr::include_graphics()` to include images. Check the source for how to add labels and captions:

```
knitr::include_graphics("images/gosling.jpg")
```

Figure 1: Ryan Gosling looking angry.

See Figure 1 for a meme.
